PROFESSIONAL SUMMARY

Bachelor's degree graduate in Informatics Engineering from Universitas Cendekia Abditama with academic experience in software development, data science, machine learning, deep learning, computer vision, mobile applications, web applications, and game development. Experienced in developing mobile applications using Flutter and Dart, managing databases using SQLite, and applying Rule-Based Systems and Simple Additive Weighting (SAW) for recommendation and prioritization features. Experienced in developing Machine Learning projects using Python, CatBoost, Scikit-learn, SMOTE, and SHAP, as well as Computer Vision projects using TensorFlow, Keras, and EfficientNetB3. Experienced in web development using HTML, CSS, JavaScript, React/Vite, Supabase, and n8n, as well as 2D game development using Godot Engine and GDScript. Strong capabilities in data analysis, problem-solving, application development, project management, time management, and teamwork. Meticulous, adaptive, responsible, capable of working independently or in a team, and highly motivated to continuously learn and advance competencies in information technology.

EDUCATION

Universitas Cendekia Abditama

Bachelor of Science in Informatics Engineering | Fresh Graduate

- GPA: 3.8+
- Academic focus: Software Development, Data Science, Machine Learning, Deep Learning, Computer Vision, Mobile Application, Web Development, and Game Development.
- Developed various academic projects based on applications, data, artificial intelligence, and information technology.

SMA Negeri 1 Muarasipongi

Natural Sciences (IPA) | 2019–2022

ACADEMIC PROJECTS

Mental Health Classification

Python | *CatBoost* | *Scikit-learn* | *SMOTE* | *SHAP*

- Built a classification model with preprocessing and handled class imbalance using SMOTE.
- Performed hyperparameter tuning and model interpretation using SHAP.
- Achieved a test accuracy of 96.95%.

Indian & Korean Food Classification

Python | *TensorFlow* | *Keras* | *EfficientNetB3*

- Developed an image classification system for food datasets using EfficientNetB3 transfer learning.
- Performed resizing, normalization, augmentation, and evaluation across various metrics.
- Achieved an accuracy of 92.23% on the Indian dataset and 98.70% on the Korean dataset.

Reminder AI

Flutter | *Dart* | *SQLite* | *SAW* | *Rule-Based System*

- Developed an Android mobile application to help students manage tasks and deadlines.
- Applied SAW to determine task priorities and Rule-Based System for study schedule recommendations.
- Implemented deadline notifications, daily reminders, calendar, and light/dark mode.

Desa Legok Village Administration Website

React/Vite | *JavaScript* | *n8n* | *Supabase*

- Developed an integrated digital public service platform with online certificate services and citizen complaints.
- Integrated an AI Chatbot based on n8n workflows and a Supabase database.

2D Game (FlyHero)

Godot Engine | GDScript | 2D Physics

- Developed an aviation-themed 2D arcade game using Godot Engine.
- Implemented character movement, object physics, collision detection, and a scoring system.

Web-Based Karaoke Application

HTML5 / CSS3 | JavaScript | Web Audio API

- Built an interactive karaoke platform with real-time automatic lyric synchronization.
- Implemented audio pitch control and a pitch spectrum visualizer.

Ticket Booking Application

Flutter | Dart | Local Storage | UI/UX

- Developed a mobile-based ticket booking application for events and transportation.
- Implemented interactive seat mapping, QR Code e-tickets, and order management.

WORK EXPERIENCE

Frozen Food Production Staff, Tangerang, Banten

August 2023 – March 2024

- Assisted in product production and packaging processes according to work procedures.
- Checked product condition and quality before storage.
- Assisted in recording production volume and inventory management.
- Maintained cleanliness of work areas and equipment, collaborating with the team to achieve production targets.

Cashier & Financial Administrator

January 2026 – March 2026

Paparipi, Tangerang, Banten

- Handled cash and non-cash customer payment transactions accurately and meticulously.
- Managed and recorded daily income and expenses.
- Reconciled transactions to ensure financial records matched cash on hand.
- Prepared basic financial reports and managed transaction receipts and daily petty cash.
- Provided customer service and supported smooth business operations.

TECHNICAL SKILLS (HARD SKILLS)

Programming Languages: Python, Dart, JavaScript, HTML, CSS, GDScript

Mobile Development: Flutter, Dart, SQLite, QR Code

Web Development: HTML5, CSS3, JavaScript, React/Vite, Web Audio API

Data Science & Machine Learning: Machine Learning, Data Preprocessing, Feature Engineering, CatBoost, Scikit-learn, SMOTE, SHAP, Model Evaluation

Deep Learning & Computer Vision: TensorFlow, Keras, EfficientNetB3, Transfer Learning, Image Classification, Image Augmentation

Databases: SQLite, Supabase

Game Development: Godot Engine, GDScript, 2D Game Development, 2D Physics, Collision Detection

Automation & Tools: n8n, Git, GitHub

PROFESSIONAL SKILLS

Problem Solving & Analysis | Data Analysis | Analytical Thinking | Attention to Detail | Project Management | Time Management | Communication | Teamwork | Adaptability | Self-Directed Learning | Responsibility

PORTFOLIO
